

ABSTRACT

G-IIC-248

MASON-DIXON LINE: MILESTONE NO. ---(203) 1767 (area surveyed; mound)
Keyzers Ridge, Maryland vicinity
Public/private

Milestone No. ---(203) is probably only a "small mound" (if as noted by the 1900-03 Resurvey of the Maryland-Pennsylvania boundary on the engineer's map, Plate LXVII, MGS Vol. 7, 1908), but may have been monumented in 1902 (if as described in their listing, p. 98). Neither monument nor mound was located at the time of the field inspection of the Maryland-Pennsylvania boundary in 1950; and the most likely/^{mound}prospect found on the east slope of Keyser Ridge during the field inspection in 1984 is dubious. Until the location and site are resurveyed by a civil engineer, descriptions/^{are unreliable}and significance cannot be determined.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Milestone No. ---(203) is probably only a "small mound" (if as noted by the 1900-03 Resurvey of the Maryland-Pennsylvania boundary on the engineer's map Plate LXVII, MGS Vol. 7, 1908), but may have been monumented in 1902 (if as described by the Resurvey as "Stone monument on Keyser Ridge, about half a mile west of the preceding," p. 98). Neither monument nor mound was located at the time of the field inspection in 1950; and although the enclosed photos show a likely mound prospect found during a re-inspection field-search in 1984, a reliable determination will have to await an official resurvey by a civil engineer, or more specific field descriptions among the 1900-03 records at the National Archives. The area here is ^{the}very remote, densely forested/^{steep}eastern slope of the north

end of the ridge called Keyser Ridge by the 1900-03 Resurvey, well into the Maryland Department of Natural Resources' Savage River State Forest. The site is within Election District 3 of Garrett County, MD, and Addison Township of Somerset County, PA; about 2 miles north-northeast of the crossroads settlement of Keyser's Ridge; off the east side of the recently constructed/^{and restricted}access road to the/^{Columbia Gas}pipeline; somewhere between the ridge and Puzzley Run, a distance of about 1600 feet to the east. The site of the mound photographed is about at the mark on the quadrangle made by Blaine Miller, who served as surveyor for Columbia Gas along this part of the boundary about at the 2400-foot elevation line. Other marks on the quadrangle were transposed from other sources: at the ridge (the MD-DOT map No. 183A); next east, from the 1900-03 Resurvey map Plate LXVIII; the Miller estimate; the 1900-03 Resurvey notes; the MD-DOT No. 183; and close to Puzzley Run, PA-DOT.

We could not find anyone who had seen a monument on this east slope of the mountainside at the Line. The DNR staff/^{including the}member who accompanied us had no knowledge of even the mound, and with so many uprooted tree-mounds along the way, none actually seemed a certainty. The mound photographed was a rather large one, about 12 feet in diameter by about 3 feet high at the center, a mixture of stone and earth, with a young tree growing out of the center, strewn with leaves and dead branches; and can be seen from the/^{old}pipeline when foliage is dormant.

SURVEYORS

STATEMENT OF SIGNIFICANCE

Until the site ^{is} redetermined through an official resurvey of this part of the Maryland-Pennsylvania boundary, the existence ^{and significance} of a "small mound" as shown on the 1900-03 Resurvey map (Plate LXVII) cannot be determined. If such a mound remains (as the one photographed), the significance on the national and state levels would be primarily as one of the thematic group series of some 248 markers still visually defining Mason and Dixon's West Line, the 230.228-mile provincial boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. This part of the Line was surveyed and marked in 1767, and ^{the site} may have been monumented in 1902 with one of the new Cockeysville marble posts (although the ^{published} Resurvey notes contradict their engineer's map). Locally, when the existence of a mound ^{as one of some 42 markers along the present Garrett/Somerset-Fayette county boundary} or monument is verified, ^{it} (or they) would also be significant ^{identifiable} for the relationship to the colonial and Civil War heritage of these counties.
